

PUPIL'S EXAMINATION.

April 21, 1906.

[Under Act of March 28, 1902.]

Writing.

Copy the following selection, paying particular attention to neatness, punctuation and capitals:

Leaves have their time to fall,
And flowers to wither at the north wind's breath,
And stars to set; but all—
Thou hast all seasons for thine own, O Death!

MRS. HEMANS.

His Soft Spot.

A well known Brooklyn minister has a strong objection to the habit some young men have of parting their hair in the middle. The other day when one of his sons came to the breakfast table he noted that offense was given in this respect and inquired rather sarcastically if parting the hair in the middle was not done to conceal the "soft spots" at the sides.

"Maybe so, father," was the retort. "But then I guess your soft spot is right on top of your head."—New York Post.

Coffee Cake.

Sift one teaspoonful each of salt, cinnamon and cloves with one and one-half cups of flour. Clean one cupful of raisins and stir into one-half cupful of flour. Cream one cupful of sugar with one-half cupful of butter, add one-half cupful of molasses, beat well, then add alternately flour and one cupful of cold coffee in which one teaspoon of soda has been dissolved. Lastly add the floured raisins and beat thoroughly before turning into the cake pans.—Good Housekeeping.

Laundering Linen.

An authority on laundering linen writes thus: "Use pure soap, fresh clean water and lots of it, plenty of air and sunshine and carefully avoid starch. You should be careful to rinse the pieces thoroughly in good clean water and then give them plenty of light and air. They should be ironed damp to get that fine sheen so characteristic of well laundered linen. If linen is ironed dry, or nearly so, it gets fuzzy."

Copper Vessels.

If copper is put away damp or in a damp place, it corrodes and is converted into a violent poison. It is also acted upon by fat and oil. Therefore when copper vessels have been used for preparing food should never be suffered to remain in them. Many cases of poisoning have occurred from soup or other food into which fat entered largely having been left some time in copper boilers.

Bathing the Face.

The ideas of many authorities are at variance concerning the question of the temperature of the water for bathing the face. A good plan is to wash the face at night with very hot water and soap; rinse in clear warm water of same temperature; then apply cold cream to face and finally dash cold water on the face to close the pores. This is the most effective way to use cold cream.

Toast Better Than Bread.

Toast is better as an article of diet than ordinary bread, says Health, for the reason that it is better cooked and therefore more easily digested. "The toasting destroys the life of the yeast and eliminates some of the harmful products of yeast fermentation, and the action of the heat converts the starch into a more digestible substance."

Renewing Hair Mattresses.

Hair mattresses that have become hard and solid can be made nearly as good as new by ripping them, washing the ticking and picking the hair free from lumps and keeping it in a dry, airy place several days. Fill the ticking lightly with hair and tack it together.

Shoes and the Feet.

Never think that the feet will grow larger from wearing proper shoes. Pinching and distorting make them grow not only large, but unsightly. A proper, natural use of all muscles makes them compact and attractive.

A very simple method of reducing superfluous flesh is to rub the affected parts with alcohol several times a day. By exercise and diet you should reduce your weight gradually in a month.

Cover a greasy spot on the matting with French chalk and sprinkle benzine over it. Allow the benzine to evaporate and brush off the chalk, when the greasy spot will have disappeared.

A thin layer of any astringent powder if placed in the foot will lessen perspiration. Tannic acid and alum are cheap and strong.

Don't use a galvanized iron squeezer. When brought into contact with the lemon juice it forms a poisonous salt.

Mirrors and Gilt Frames.

Water should never be put on gilt frames. They should be wiped with dry cloth or chamois. This applies to all metal and lacquered goods. After a lacquered hat has once been wet and polished it must be continually polished, so the best plan is to keep it dry as long as possible. Rattles are deadly enemies of mirror backs and yearly ruin many millions of dollars' worth. For this reason the old silver-back mirror is passing away, and the new ones are coated with a composition which is proof against rattles and insects, but which does not give us fine a reflection as the other sort.

Wall Paper Candle Shades.

Extremely pretty and effective candle shades are made from the flowered wall papers, of which there is a large choice in the shops. Almost any color scheme for a dinner table may be assisted by use of these shades. They are inexpensive and not at all hard to make. It is well before cutting the shades to paste the paper on the thinnest of muslin or cheesecloth. This gives the paper more body and prevents the edges from tearing. Use mica shades under the paper for fear of a conflagration.

Not a Matter of Arithmetic.

"I hear you're very good at arithmetic, Bobby," said the visitor pleasantly.

"Sure," returned Bobby, without looking up from his play.

"Well, if I should tell you when your papa and your mamma were born could you tell me how old they are?" asked the visitor.

"I could tell you how old papa is," answered the boy.

"And not how old your mother is?"

The boy shook his head.

"Arithmetic hasn't anything to do with that," he said.

Probate Notice.

Notice is hereby given that the following Accounts and Vouchers have been filed in the Probate Court of Hocking County, Ohio, for first and final settlement, The Infirmary Directors of Hocking County, Ohio, guardians and trustees of Anna Swearingen, an imbecile, now deceased, and the same will come on for hearing on the 12th day of May, A. "DROPS" taken internally, rid the blood of the poisonous matter and acids which are the direct causes of these diseases. Applied externally it affords almost instant relief from pain, while a permanent cure is being effected by purifying the blood, dissolving the poisonous substances and removing it from the system.

DR. S. D. BLAND

of Brewton, Ga., writes:

"I had been a sufferer for a number of years with Lumbago, Kidney Trouble, and all the other ailments of the digestive system. I had tried all the remedies that I could get, but nothing would do me any good. I then tried 'DROPS' and in a few days I was free from all my troubles. I can now do all the work I wish to do, and I am in perfect health. I can now do all the work I wish to do, and I am in perfect health. I can now do all the work I wish to do, and I am in perfect health."
